## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 7-8, and 11/1-11/3, 11/7-11/8, drawn to a capacitor wherein a ceramic coating layer is formed at a contact portion with the sealing member and the cathode leading means/at a contact portion of the rivet with the sealing component/on said cathode leading terminal.

Group II, claim(s) 4-5, 9-10, and 11/4-11/5, 11/9-11/10, drawn to a capacitor wherein an insulating synthetic resin layer is formed at a contact portion of the cathode leading means with sealing member/ at a contact portion of the rivet with the sealing component/ on said cathode leading terminal.

Group III, claim(s) 6, 11/6, drawn to a capacitor wherein a partial cross-linking peroxide butyl rubber that peroxide is added as cross-linking agent to a butyl rubber polymer comprising a copolymer of isobutylene, isoprene, and divinylbenzene is used as said sealing member.

- 2. The inventions listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to a capacitor wherein a ceramics coating layer is formed at a contact portion with the sealing member and the cathode leading means/at a contact portion of the rivet with the sealing component/on said cathode leading terminal. Group II is drawn to a capacitor wherein an insulating synthetic resin layer is formed at a contact portion of the cathode leading means with sealing member/ at a contact portion of the rivet with the sealing component/ on said cathode leading terminal.
- 3. The inventions listed as Groups I & III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to a

Application/Control Number: 10/534,235

Art Unit: 2831

capacitor wherein a ceramics coating layer is formed at a contact portion with the sealing member and the cathode leading means/at a contact portion of the rivet with the sealing component/on said cathode leading terminal. Group III is drawn to a capacitor wherein a partial cross-linking peroxide butyl rubber that peroxide is added as cross-linking agent to a butyl rubber polymer comprising a copolymer of isobutylene, isoprene, and divinylbenzene is used as said sealing member.

Page 3

- 4. The inventions listed as Groups II & III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II is drawn to a capacitor wherein an insulating synthetic resin layer is formed at a contact portion of the cathode leading means with sealing member/ at a contact portion of the rivet with the sealing component/ on said cathode leading terminal. Group III is drawn to a capacitor wherein a partial cross-linking peroxide butyl rubber that peroxide is added as cross-linking agent to a butyl rubber polymer comprising a copolymer of isobutylene, isoprene, and divinylbenzene is used as said sealing member.
- 5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Application/Control Number: 10/534,235 Page 4

Art Unit: 2831

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Thomas whose telephone number is 571-272-1985. The examiner can normally be reached on Monday - Friday 6:30 AM - 3:45 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
